Tooth 30 · extraction

Tooth 30 removed. A healing review is booked before a replacement decision.

TOOTH 30 · REMOVED

Lower right first molar

Recorded: 2026-09-09

Planned: Healing review

YOUR CARE AT HOME

The next 72 hours

Soreness: Some pain can happen as numbness wears off. Swelling: Mild swelling can last a few days. Saliva: A little pink saliva can happen at first.

Protect the area

Rest: Take it easy today. Food: Choose soft foods that are easy to chew. Socket: Do not poke the area. Follow-up: Use the plan your dental team gave you.

Extraction review & replacement discussion

Booked in demo

WHEN TO GET HELP

Fever: You feel hot or have a fever. Chills: You feel shaky or cold. Swelling: It spreads to your neck or under your tongue. Swallowing: It is hard to swallow. Breathing: It is hard to breathe. Bleeding: It will not stop.

Emergency: Go to the ER now for these red flags. Call: Call our office, too. Waiting: Do not wait for a text reply.

FOR YOUR NEXT CONVERSATION

Your goal: Chew comfortably again and understand the options for replacing my back tooth.
